

Day 1 Maths – Week 2 – Summer 1

Today, we would like the children to have a go at practising their 5x table.

Below are a list of resources that the children might like to try, to help them to be able to confidently recall these facts.

There is no expectation that all of the resources need to be completed, just use the ones that you and your child would like to complete to help them with their learning. These are just some ideas.

You might like to try the following websites:

<https://www.bbc.co.uk/teach/supermovers/ks1-maths-the-5-times-table/zhbm47h> - A song to help the children learn the 5x table.

<http://www.snappymaths.com/multdiv/5xtable/5xtable.htm> - Lots of games to play and sheets to download to practise the 5x table facts.

<https://www.timestables.co.uk/5-times-table.html> - different games to check your 5x table knowledge in a variety of ways.

If your child is finding it tricky to learn the times tables, you might like to begin by practising counting in 5's. There is a counting in 5's sheet below to help.

Maybe you might like to make a giant number track outside with chalk to help you practise counting forwards and backwards in 5's?

Have fun!
