

Science Home Learning wb 4.5.20

Do you remember when we were at school last half term we learnt about the life cycles of a human and a duck? Now we are going to find out about the life cycle of a plant. This will be really interesting, especially if you are growing your own plants at home.

- Look at the Twinkl PowerPoint. Look at and think about what is happening in each picture and talk to a grown up about it.
- These short videos on YouTube will also help you to understand the life cycle of a plant.

<https://www.youtube.com/watch?v=tkFPyue5X3Q>

- Choose how you would like to show us your learning about the life cycle of a plant. You could:
 - Use the computer
 - Take photos of seeds that you are growing and add labels and captions.
 - Keep a diary of seeds that you are growing
 - Draw a diagram

Explorify

There is an amazing website for science called 'Explorify'. It is free to use and has lots of ideas for activities, video clips and photos to help you learn about all sorts of science. It is free to join. The link is:

<https://explorify.wellcome.ac.uk>

You can select your topic (plants) and age range at the top. A great one to try is called 'Sprouting Shoots'. What else can you find that helps you to learn about plants? Have fun!
