

In school we use Education City to learn skills in English, Maths, Science and Computing. In readiness for year 2, your child has been given home access to this great website.

They have been set some tasks to do from now until the start of year 2 to help them practise their spelling and maths skills should you wish them to do so. They can also choose to play a number of different games in English, Maths, Science and Computing or compete online against their friends at school.

Education City works on computers and also has a tablet friendly view for use via safari on ipads and tablets.

On Friday your child will come home with a letter explaining how to access Education City and their own user name and password – please look out for this in their book bags.

It would be great if the children could use Education City over the holidays in order to become familiar with it ready for year 2 and to complete the tasks set, which can be viewed by their new class teachers.

If you have any questions, please ask your child's current class teacher.

Have fun!

Year 1
