

# Home learning Summer 1

We are revising how to add and subtract 2 digit numbers. Please have a go at these at home, partition and then use a number line.

$43+10=$

$65+20=$

$31+30=$

$22+40=$

$34+25=$

$45+27=$

$26+35=$

|          |                                                                                    |
|----------|------------------------------------------------------------------------------------|
| $43-10=$ |  |
| $65-20=$ |                                                                                    |
| $41-30=$ |                                                                                    |
| $62-30=$ |                                                                                    |
| $44-25=$ |                                                                                    |
| $65-27=$ |                                                                                    |
| $66-35=$ |                                                                                    |
| $76-33=$ |                                                                                    |
