

Year 2 home learning Spring 2

Your main home learning activity this half term is to print out photos or pictures of places you have visited on holiday or walk around your local area and sketch the landscape. Then label the human and the physical features you spot. These could include: beach, cliff, coast, forest, hill, mountain, sea, ocean, river, valley, vegetation, city, town, village, factory, farm, house, office, port, harbour, shop, bridge, road and railway line.

In addition, we will be setting a short maths or reading activity each week :

- Maths – this will be a sheet of questions practising the key addition, subtraction, multiplication, division and fraction skills that we have learnt this year.
- Reading – this will be a reading comprehension activity which we would like you to do with a grown up. Remember to find the answers in the text and underline them before you write the answers down.
